

Nebraska VR

Career Pathways Advancement Project

Are you interested in advancing your career?

The Career Pathway Advancement Project (CPAP) Grant:

- expands career opportunities
- cultivates workforce development through educational advancement and training
- increases economic opportunity

What does educational advancement look like?

- Work based learning, i.e., on-the-job training, cross training, or job coaching
- Certification or Diploma Programs
- Associate, BA, MA, PHD

Who pays for tuition and fees?

The Career Pathway Advancement Project (CPAP) Grant provides tuition and fee costs for the following:

Industry Certification – Tuition, fees, books, and supplies are paid at the cost identified by the training institution. Training Programs for Diploma, AAS, BS, MS, PhD – The cost of tuition and

fees are paid at the Nebraska public college or university rate. Private and out-of-state tuition are also paid at the Nebraska public college rate. The cost of books and supplies can also be paid.

What other services are provided?

Career Pathway Advancement Project participants are offered assistance in covering their transportation costs to attend training or are offered a stipend to cover additional training costs.

Participants who choose to receive a stipend will receive \$250.00 after attending the first day of class.

Upon completion of the industrial certification, participants are paid another \$250.00 stipend once a copy of the certification is shared with the Career Pathway Recruiter.

Participants training for diploma programs receive \$375.00 stipend after each completed 12 hours as identified by grade transcripts.

What is in it for a business?

This is an opportunity to retain key talent. Investing in employees is a great way to retain employees in the future and improve morale.

How do I get started?

Nebraska VR

Career Pathways Advancement Project

The Career Pathways Advancement Project (CPAP) is designed to help individuals with a disability to explore and access opportunities to advance in their employment. Through a combination of classroom and on-the-job training, individuals earn the recognized post-secondary credentials required for advancement within a specific industry. Employers are provided access to a group of potential employees with the required and relevant skills. This project is funded by a five-year grant awarded to Nebraska VR in 2015.

Upskill/Backfill

CPAP's goal is to upskill individuals working in the high-demand occupations of Manufacturing, Transportation, Distribution and Logistics (TDL), Information Technology, Healthcare and Construction through training and education and backfill the vacant positions they formerly held with qualified job-ready candidates that are new to the VR program. The project will assist individuals established in their careers to realize long-term employment goals, open new opportunities for entry-level workers, and meet the needs of local employers in growing industries by incentivizing advancement with paid training and stipends.

Recruitment

Career Pathway Recruiter, Zach Arter will be working with individuals with a disability who want to advance within one of the five designated career pathways. Zach helps these individuals access a variety of supports in order to assist in advancement. CPAP services include funding college education, funding training/certificate programs, paid on-the-job training for career progressions, and facilitating increased access to technology and benefits planning. These individuals will be monitored and provided with services throughout the duration of their education or training. Zach will also follow up with advanced workers and their employer for a minimum of 90 days after their advancement to ensure client and employer satisfaction.
