

# CPAP 2.0 Success Story

*Transferable Skills,  
Benefits Counseling,  
Career Planning*

Dorriya Williams graduated from the Good Samaritan Hospital Project SEARCH site in Kearney, NE. With her transferable skills, she was successfully employed at Subway after high school and was known to be reliable and dependable. Four years later when she got the call about the Career Pathways Advancement Project (CPAP 2.0) grant, she wanted to talk about some of the career paths she explored as an intern. Her Career Pathways Recruiter worked with her through career planning, benefits counseling, and addressing test anxiety. She participated in an on-the-job evaluation at CVS Pharmacy that she loved and then landed a new job as a home care provider with more hours and an increased hourly rate. Dorriya continues to work towards her long-term goal to become a Pharmacy Tech.
